Subject: Inspection 03034418/2008001, Materials License No. 29-30383-01

Dear Sir:

This is in response to the Notice of Violation from Inspection 03034418/2008001. The inspection conducted on March 5, 2008 by Mr. Dennis Lawyer identified that the annual review of our radiation protection program content and implementation was due on December 13, 2007 and had not been done as of the date of the inspection.

In the past, we have conducted regular annual audits and are well aware of the requirement. However, in September 2007, our company experienced a significant layoff that included our Radiation Safety Officer (RSO). In the process of appointing a new RSO the implementation of scheduling the annual audit was delayed. However, an audit was conducted by Wesley R. Van Pelt Associates, Inc. on March 12, 2008 and March 20, 2008 and as in the past the audit was useful in our securing full compliance with regulations. The written audit report dated March 26, 2008 has been received by management. To prevent future problems with scheduling these annual audits, the next audit has been scheduled with Wesley R. Van Pelt Associates, Inc. for December 2008.

We believe the above fully addresses the violation listed in the Notice of Violation. Please feel free to contact me or Marie Makhlina (RSO) if you have any questions.

Sincerely,

Stephen T. Wills  
Chief Financial Officer, EVP-Operations
