SUBJECT: SEABROOK STATION - NRC PHYSICAL SECURITY BASELINE INSPECTION
REPORT 05000443/2008403

Dear Mr. St. Pierre:

On May 22, 2008, the U.S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your Seabrook Station. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed report documents the inspection results, which were discussed on May 22, 2008, with you and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel.

Based on the results of this inspection, no findings of significance were identified.

When separated from its Enclosure, this document is DECONTROLLED.
