Bob replied with the following:

The acceptance review did not identify any issues that would prevent the staff from moving forward with the environmental review. No issues were identified that resulted in changes to the schedule or resource assumptions for developing an Environmental Impact Statement (EIS). The model review schedule has a 24 month duration. Staff intends to issue the Federal Register Notice of Intent to prepare an EIS and conduct environmental scoping on February 22. The notice opens a 60 day comment period regarding the scope of the staff's environmental review. Staff is preparing to conduct an environmental site audit beginning on March 31. Staff will hold public scoping meetings on April 3.

Let me know if there are any changes or additions.

Thanks,
Cliff

Cliff,

I just left you a voicemail. I'll be on travel tomorrow and I want to make sure that you have what you need for tomorrow's briefing for Jaczko. Mallecia Hood is the lead environmental PM for Bellefonte and Stacey Imboden is her backup. They should be able to give you what you need.

Mallecia and Stacey, if you can get with Cliff ASAP (x2529, T6-J10), that would be great.

Thanx,

Butch

Good idea. Joe and Cliff will have to jointly prepare the summary on the technical issues to capture the latest status.

Dave and Nilesh,

If okay with you, Joe Sebrosky and Cliff Munson will meet with the commissioner. We will develop a one pager that summarizes schedule as well as the three topics he requested - hydrology, seismology, and environmental. Joe will cover schedule development and Cliff will handle the other topics.

We plan to produce this one-pager today and will share with you.

Stephanie

Please let me know who is available from 3:30-4:30. NRO should plan on sending no more than 3 because this will be a joint briefing with NRR (on Watts Bar).

The Commissioner's Office provide only one time for the briefing: 3:30 - 4:30 PM on Friday 2/15. Please confirm your support for this briefing.
