

SAFETY EVALUATION REPORT
Docket No. 71-5757
Model No. Neutron Source Shipping and Installation Container
Certificate of Compliance No. 5757
Revision No. 10

SUMMARY

By application dated March 13, 2008, the Department of Energy, Naval Reactors, requested renewal of Certificate of Compliance No. 5757, for the Model No. Neutron Source Shipping and Installation Container. The Certificate of Compliance has been renewed with an expiration date of October 1, 2008.

EVALUATION

The applicant states there has been no container modification or operational experience which would preclude the continued use of the container. The applicant did not propose changes to the Certificate of Compliance and the package is grandfathered under the provisions of 10 CFR 71.19(a), therefore any sources must be shipped in the package prior to October 1, 2008.

Condition No. 8 was added into the Certificate of Compliance to state that air transport of fissile material is not authorized.

CONCLUSION

Based on the statements and representations contained in the renewal request and the conditions listed above, the staff concludes that the Model No. Neutron Source Shipping and Installation Container meets the requirements of 10 CFR Part 71. The Certificate of Compliance No. 5757 should be renewed until October 1, 2008.

Issued with Certificate of Compliance No. 5757,
Revision No. 10, on May 30, 2008.
