Re: EnergySolutions Import License
Application IW023

To Whom It May Concern:

We cannot fathom that you, our government of the USA, would even consider allowing our country to be a dumping ground for the world's nuclear waste.

In one breath you are making our lives more burdened with not allowing our country to access oil availability here, using tax dollars for environmental issues that consider our health and welfare and than you turn around and want us to agree to accepting foreign toxic waste dumping.

We say NO and we are adamantly opposed to you even considering this proposal! May God save this great land. What and who are you thinking of in terms of the future of this country and humanity. Let Italy and the other nations solve their own problems. Please ban this importation!

Sincerely,

Joem Schweik
Richard Schweik, 3553 Hwy. 76, Cottontown, Tn. 37048
