RE: Energy Solutions Import License Application 1WO23

Gentlemen:

As a citizen of the United States (and, specifically, a citizen on the State of Tennessee), I am very concerned that you are considering an application to allow the importation of 20,000 tons of radioactive waste from Italy.

While we live in a "global environment," it is time for the regulatory authorities of the United States to place the protection of the United States citizens first.

I urge you to block other countries from sending any type of waste products (especially radioactive) to the United States. It is time to let other countries take care of their own problems and focus on rebuilding the United States of America.

Again, I urge you to deny the request to import radioactive waste from Italy.

Sincerely,

Janey Lee Smith
