Subject: comment on proposed rule

Dear NRC folks:

This regards the proposed rule, Limiting the Quantity of ByProduct Material in a Generally Licensed Device; NRC-2008-0272.

We can hardly be too careful in regulating nuclear material, and we have in many ways not been careful enough up to now. So this proposed rule is a step in the right direction.

One thing should be included in this rule which i do not see included at this point: strict accountability. That should mean refusal to renew or to issue further licenses to those individuals and corporations that have violated substantive parts of licensing rules, or that have two or more minor violations.

Thank you,

Richa
c/o 600 Cass Av. S.E.
