NRC Review of Final Safety Analysis Report

NRC RAI NUMBER: 02.03.02-03

Please verify that the monthly and average mixing heights and ventilation rates presented in FSAR Table 2.3-303 and Table 2.3-211 are correct. The staff was unable to reproduce the values presented in the tables. The staff values were higher. It appears that the missing/blank values in the mixing height data base were averaged into the calculation as zeros.

BLN RAI ID: 3573

BLN RESPONSE:

The monthly and average mixing height and ventilation rate values have been recalculated with the blank/missing data removed. FSAR Tables 2.3-303 and 2.3-211 and the associated text will be revised in a future COLA revision as indicated.

This response is PLANT SPECIFIC.
