Ron:

As we discussed earlier today, we were not able to complete the restoration response to NRC RAIs last Friday. We are very close, but have two outstanding items to complete. We will submit the response no later than October 2, 2009. Regardless of the actual submittal date, we will plan on having the Petrotek rep. on site 9/30. At a minimum we will be prepared to discuss general aspects of the restoration if so desired.

Tom:
I hadn't planned on that, however, since we are expecting replies to RAI's tomorrow for the wellfield restoration report, and there will be two other hydrogeologists on the trip, it might not be a bad idea to plan on having Petrotek attend to discuss some issues in the field.

Ron:

That will be fine. Probably Mark Owens, mine manager, and myself will accompany you on the tour. Will the Christensen Ranch restoration be a topic of discussion during the tour? If so, is there a need to have along a representative from Petrotek, our consultant on the report?

Tom:

NRC staff Bill vonTill, Elise Striz and I would like to tour the wellfields at Irigaray and Christensen Ranch. Bill and Elise have not been to the site before and would like to get a general feel for the site and the layout. We would like to do this Wednesday morning, Sept 30, if someone is available to show us around. I don't believe they will need or want to see inside the IR CPU or CR Satellite, as that is not their primary interest in the site. I know this is the same day of the inspection, but Bill and Elise will be in WY that week on other business and a 1/2 day site visit would be helpful to both of them.

Let me know if this is workable.

Ron
