Mr. Tyler Howe
Eastern Band of Cherokee Indians
Tribal Historic Preservation Office
Post Office Box 455
Cherokee, North Carolina 28719

Dear Mr. Howe,

Subject: William S. Lee III Nuclear Station
Supplemental Water Source

On June 26, 2006, I wrote the Eastern Band of Cherokee Indians to inform you of Duke Energy's plan to construct and operate the William S. Lee III Nuclear Station in Cherokee County, South Carolina. Since that time, I have provided copies of the following surveys:

Cultural Resources Survey of the Proposed Lee Nuclear Station,
Cherokee County, South Carolina, August 2007

Cultural Resources Survey of the Lee Nuclear Station Railroad Corridor,
Cherokee County, South Carolina, January 2008

Duke Energy has determined the need for a supplemental water source to be used during drought conditions for the Lee Nuclear Station. We are investigating an area adjacent to the project site for this new industrial pond. I have attached a drawing that shows the area we are investigating in relation to the existing project site. Please advise me if you are aware of any cultural resources of interest to the Eastern Band of Cherokee Indians in this area. As usual, we will provide you with copies of our survey results.

Please also be advised that the enclosed map is considered confidential by Duke Energy since we are still in negotiations for purchase of the property.

If you have any questions please call me at 704-382-5917.

Theodore J. Bowling
Environmental Project Manager
