Subject: North Trend Expansion Area Boundary Revisions

On January 12, 2010 the Nebraska Department of Environmental Quality received a revision to the North Trend Expansion Area (NTEA) Class III Injection Well Application from Crow Butte Resources, Inc. The revision updates the proposed permit boundary for the NTEA to coincide with the cultural resources survey boundary that was conducted as part of the original submittal process. As a result, the proposed permit area has been reduced in size. I am mailing you CDs containing electronic copies of the revision. Please let me know if you have any questions regarding either the electronic copy or NDEQ's review process of the submittal.
