Subject: JAB-Antelope License Review

Mr. McConnell and Mr. VonTill,

In 2009, Uranium One Americas requested that USNRC temporarily cease review of our JAB-Antelope license application due to unknowns associated with the potential listing of the Greater Sage Grouse in Wyoming, particularly in the area of the JAB-Antelope project. JAB-Antelope is located within one of the State's Core Habitat Areas for Sage Grouse. The Governor of Wyoming is expected to announce stipulations that will be applied to project development within Core Areas during July of this year. Uranium One sees no reason for USNRC to continue their review of JAB-Antelope until we are sure of what these stipulations will entail, and how they will impact the development of JAB-Antelope. Therefore, Uranium One respectfully requests that USNRC postpone the resumption of your review of JAB-Antelope until Uranium One can fully evaluate the effects of the Governor's development stipulations on our project. We anticipate that we should be able to finalize our project development decisions prior to the end of your 2010 fiscal year. If this requires USNRC to hold-over budgeted monies for the JAB-Antelope review into fiscal year 2011, we ask that you do so if at all possible.

Uranium One appreciates your understanding in this matter, and we will inform you as soon as possible regarding our decision regarding development of the JAB-Antelope project.

Sincerely,

Donna Wichers
