1 Based on the North American Industry Classification System, 2002.

2 The figure shown is the percent of the total fatalities for that industry group.

3 "Highway" includes deaths to vehicle occupants resulting from traffic incidents that occur on the public roadway, shoulder, or surrounding area. It excludes incidents occurring entirely off the roadway, such as in parking lots and on farms; incidents involving trains; and deaths to pedestrians or other nonpassengers.

4 Includes fatalities at all establishments categorized as Mining (Sector 21) in the North American Industry Classification System, 2002, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

5 Includes fatalities to workers employed by governmental organizations regardless of industry.

NOTE: Totals for 2007 are preliminary. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. Dashes indicate no data reported or data that do not meet publication criteria. There were 2 fatalities for which there was insufficient information to determine a specific industry classification, although a distinction between private and government was made for each.

¹ The employment figures, except for military, are annual average estimates of employed civilians, 16 years of age and older, from the Current Population Survey (CPS), 2007. The resident military figure, obtained from the Department of Defense, was added to the CPS employment total.

² The rate represents the number of fatal occupational injuries per 100,000 employed workers and was calculated as follows: $(N/W) \times 100,000$, where N = the number of fatal work injuries, and W = the number of employed workers.

NOTE: Selected rate categories had 15 or more work injury fatalities in 2007. Totals for major categories may include subcategories not shown separately. Figures may not add to totals because of rounding. There were 18 fatal injuries to workers under the age of 16 years that were not included in the rate calculations to maintain consistency with the CPS employment. Data for all years are revised and final.
