<a href="#">Incidence Rates</a>	<a href="#">Death Rates</a>	<a href="#">Incidence Counts</a>	<a href="#">Death Counts</a>
		<a href="#">Incidence Population</a>	<a href="#">Death Population</a>

#### All Cancer Sites Combined. Age-Adjusted Invasive Cancer Incidence Rates and 95% Confidence Intervals by U.S. Census Region and Division, State and Metropolitan Area, and Race and Ethnicity, United States (Table 2.1.1.1MF) \*†‡

\* Rates are per 100,000 persons and are age-adjusted to the 2000 U.S. standard population (19 age groups - Census P25-1130).

95% Confidence Interval :  Hide  Show

Geographic Area	All Races	White	Black	Hispanic §
United States	473.1	472.5	481.9	367.5
United States (comparable to ICD-O-2)¶	466.7	466.1	477.1	362.1
West	448.6	456.9	462.4	349.4
Mountain				
Idaho	461.7	464.7	292.1	387.2

(Table 2.1.1.1MF) All Cancer Sites Combined. Age-Adjusted Invasive Cancer Incidence Rates and 95% Confidence Intervals by U.S. Census Region and Division, State and Metropolitan Area, and Race and Ethnicity, United States \*†‡

#### Footnotes

\* Rates are per 100,000 persons and are age-adjusted to the 2000 U.S. standard population (19 age groups - Census P25-1130).

† Data are from selected statewide and metropolitan area cancer registries that meet the data quality criteria for all invasive cancer sites combined. See [registry-specific data quality](#) information. Rates cover approximately 90% of the U.S. population.

‡ Excludes basal and squamous cell carcinomas of the skin except when these occur on the skin of the genital organs, and *in situ* cancers except urinary bladder.

§ Data for specified racial or ethnic populations other than white and black should be interpreted with caution. See [Technical Notes](#).

|| Hispanic origin is not mutually exclusive from race categories (white, black).

¶ Excludes some endometrial cancers, papillary ependymomas and papillary meningiomas, chronic myeloproliferative diseases, and myelodysplastic syndromes. These cancers are classified and reported as malignant cancers according to ICD-O-3, beginning with 2001 diagnoses. See [Technical Notes](#).

~ Rates are suppressed if fewer than 16 cases were reported in a specific category (area, race, ethnicity).

- Rates are suppressed at state's or metropolitan area's request. See [Technical Notes](#).

**Confidence interval (CI):** Range of values for a rate that will include the true value of the rate a given percentage of the time. Example: 95% CI includes the true value of the rate 95% of the time.

Notes: Cases from suppressed rates are included in the U.S. and region/division rates. Observed region/division age-adjusted incidence rates are presented for regions/divisions with >= 80% of the population covered by registries that meet the data quality criteria specified above, and if the 95% confidence intervals around the observed region/division rates for each of four major cancers include "bias- corrected" estimated region/division rates (see [Technical Notes](#) and [detailed criteria](#)) for each of those cancers. U.S. rates are as presented in Table 1.1.1.1MF. Michigan, Georgia, California, and Washington state rates each include cases from the SEER metropolitan areas.
