## **NRC ANNOUNCES AVAILABILITY OF LICENSE RENEWAL APPLICATION FOR SOUTH TEXAS PROJECT NUCLEAR POWER PLANT**

The Nuclear Regulatory Commission announced today that an application for a 20-year renewal of the operating licenses for South Texas Project (STP) Units 1 and 2 is available for public review.

South Texas Project Units 1 and 2 are both pressurized-water nuclear reactors, located 12 miles southwest of Bay City, Texas. The plant's current operating licenses for Units 1 and 2 will expire on Aug. 20, 2027, and Dec. 15, 2028, respectively.

The licensee, STP Nuclear Operating Co., submitted the renewal application Oct. 26. The application is available on the NRC website at this address:  
<http://www.nrc.gov/reactors/operating/licensing/renewal/applications/south-texas-project.html>.

The NRC staff is currently conducting an initial review of the application to determine whether it contains enough information for the required formal review. If the application has sufficient information, the NRC will formally "docket," or file, the application and will announce an opportunity to request a public hearing.

For further information, contact Carmen Fells or Tam Tran at the Division of License Renewal, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Mail Stop O11-F1, Washington, D.C. 20555; telephone (301) 415-6337 for Carmen Fells and telephone (301) 415-3617 for Tam Tran.
