Subject: New EOF

Paul-

I understand you asked for a brief status on our new EOF plans:

• We have completed our real estate search sufficiently to short list 2 properties.

- We will likely proceed with environmental due diligence testing this Fall or early next year (caveat I will be meeting with Joe and a panel of execs later this month to determine if this will be 2009 or 2010 activity)
- We have engaged all 4 counties, Region 1 NRC EP people and NYS to get stakeholder input on key facility design features
- Architect engineer has produced preliminary 1st phase sketches which will be used as we work through cost engineering
- We continue to periodically brief county people on status (next planned brief is 10/13/09)
