Lisle, Illinois 60532-4352

Dear Ms. Simmons:

As per our phone conversation on August 24, 2011, I am confirming the following regarding Advion BioService's Application for Materials License, control number 575608:

1. Advion will not be procuring or receiving any bulk isotope. We will not be performing any radiolabeling experiments.
2. Advion does not perform dosing experiments on humans or animals. The extent of the work at Advion is done on biological samples collected at a separate non-affiliated facility that are sent to Advion.

Also, you will find attached Natalie Russell's training certificates, as well as documentation of biannual radiation safety training for all authorized users. As we are currently on Eli Lilly's license, a member of their radiation safety team performed the training. Please note that scientists who work in the lab where radiation is handled, but may not necessarily partake in work with RAM at this time, were trained at the same time as well.

Furthermore, we discussed that I will work to compile an evaluation for Advion's determination not to use dosimeter badges in employees handling radioactive samples. Since Advion took over processes, equipment and employees directly from Eli Lilly, I have requested any documentation of their previous studies. I will update you as this information becomes accessible.

Sincerely,

Mathew J. Prezioso
Environmental Health and Safety Specialist, RSO

Enclosure: Natalie Russell RSO Certificate, Biannual Awareness Training
