Regulatory Changes to Implement the United States/Australian Agreement for Peaceful Nuclear Cooperation; Final Rule, 10 CFR Part 40 (RIN 3150-A195; NRC-2011-0072)

On November 8, 2011, the NRC published a final rule in the *Federal Register* (76 FR 69120) amending its regulations to implement the 2010 “Agreement between the Government of Australia and the Government of the United States of America Concerning Peaceful Uses of Nuclear Energy.” This Agreement prohibits the United States from using Australian-obligated nuclear material to produce tritium for use in a nuclear explosive device, or for any other “military purpose.” The amendments in this final rule help enable the U.S. Government to meet its agreement obligations with the Government of Australia. This final rule was effective on November 8, 2011.

Taxpayers and Ratepayers United, et al.; Environmental Impacts of Severe Reactor and Spent Fuel Pool Accidents; Petitions for Rulemaking; Notice of Receipt, 10 CFR Part 51 (Docket Nos. PRM-51-14, et al.; NRC-2011-0189)

On November 10, 2011, the NRC published a notice of receipt in the *Federal Register* (76 FR 70067) on 15 petitions for rulemaking (PRMs), each dated August 10, August 11, or August 12, 2011, from multiple petitioners. The petitioners request that the NRC rescind its regulations that allow generic conclusions about the environmental impacts of severe reactor and spent fuel pool accidents and its regulations that preclude considerations of those issues in individual licensing proceedings. The petitioners also request the NRC to suspend multiple ongoing licensing proceedings while the NRC considers these petitions and the environmental issues raised in the Fukushima Task Force Report, “Recommendations for Enhancing Reactor Safety in the 21st Century: The Near-Term Task Force Review of Insights from the Fukushima Dai-ichi Accident” (ADAMS Accession No. ML111861807), dated July 12, 2011. The NRC is not instituting a public comment period for these PRMs at this time.

Receipt and Availability of License Renewal Application for Grand Gulf Nuclear Station (GGNS)

On November 1, 2011, the staff received an application from Entergy Operations, Inc., requesting the renewal of the operating license for GGNS Unit 1, for an additional 20 years beyond the current 40-year term. The current operating license expires at midnight on November 1, 2024. The application is available at the website. <http://www.nrc.gov/reactors/operating/licensing/renewal/applications/gg1.html> and in ADAMS under Accession No. ML113080132. The staff tentatively plans to hold a public information session near the plant in early 2012 to provide an overview of the license renewal process and to solicit public comments on the scope of the staff's environmental review.
