Dear NRC. I would like to ask you to stop relying upon your generic EIS and fully consider the likely impact to our land and water and air from uranium mining in Crook County. That area has over 5,000 abandoned drill holes and some of these wells were improperly plugged. It is really up to your commission to protect citizens...not exploit the land and kill people. What would happen with one major earthquake and all the so called safety measures. We not NOT WANT Uranium mining. Thank you.
