General Comment

The public has recieved judgements of billions of dollars in liabilities for injuries to nuclear workers from exposure and accidents. We are obligated to pay individual states for thier on going storage of nuclear waste. Eco systems destroyed, trillions already in clean up cost with a new design being approved that has substantial concern as to its ultimate safety, We have to stop nuclear proliferation and hold government officials accountable for advocating for this industry. The population has been mis-led to believe that this is a safe and clean tecnology. It really is a criminal government propaganda crime. Stop, before more activists around the world are put in prisons, or there is a major melt down here. This whole situation is insanity, as I've watched the NRC exposed as working for this industry and a number of congressman who advocate for them. Crimes against humanity
