

## UNITED STATES NUCLEAR REGULATORY COMMISSION WASHINGTON, D.C. 20555-0001

January 13, 2012

Mr. Ken Langdon Vice President Nine Mile Point Nine Mile Point Nuclear Station, LLC P.O. Box 63 Lycoming, NY 13093

## SUBJECT: NINE MILE POINT NUCLEAR STATION, UNIT NO. 2-CORRECTION LETTER TO AMENDMENT NO. 140 RE: EXTENDED POWER UPRATE (TAC NO. ME1476)

Dear Mr. Langdon:

By letter dated December 22, 2011 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML113300041), the Nuclear Regulatory Commission (NRC) issued Amendment No. 140 to Facility Operating License No. NPF-69 for Nine Mile Point Nuclear Station, Unit No. 2. The amendment increased the authorized maximum steady-state reactor core power level by approximately 15 percent, from the current licensed thermal power of 3,467 megawatts thermal (MWt) to 3,988 MWt.

Your staff recently informed the NRC of a discrepancy in the required implementation date for the amendment. In the application dated May 27, 2009 (ML091610091), Nine Mile Point Nuclear Station, LLC requested implementation of the amendment upon startup from the spring 2012 refueling outage. However, in the license amendment, we inadvertently required implementation within 90 days of the date of issuance which would be prior to the spring 2012 refueling outage. This was an oversight on our behalf.

The corrected page of the amendment is enclosed. Please feel free to contact me at 301-415-1030 if you have any questions.

Sincerely,

Hyman

Richard V. Guzman, Senior Project Manager Plant Licensing Branch I-1 Division of Operating Reactor Licensing Office of Nuclear Reactor Regulation

Docket No. 50-410

Enclosure: As stated
