Good job this week. While we have left the site for a week, licensee walkdown and followup activities continue. I've asked Greg to see if he can forward their daily engineering log to each of us. When you get these, please screen it in your area of expertise for items warranting inclusion as an inspection sample for either in office review or inspection on return to the site.

For next week I'll set up a daily call at 0800 for us similar to our meetings onsite to review status.

Thanks again for your hard work.

Mark
