Subject: RE: Your e-mail of Dec. 3

Mr. Leyse;

Thank you for your e-mail to Chairman Jaczko. The Japanese government is currently conducting research that directly relates to your questions regarding accident conditions at Fukushima Dai-ichi. As the Japanese government releases information from that research, the NRC will incorporate the findings into its Japan Near-Term Task Force lessons-learned effort. The NRC will also use information from Japan in similar regulatory activities, such as the recent petition for rulemaking on hydrogen generation that you are already familiar with. Thank you.
