Subject: Monitor Well 7MW-32

Ron/Blair/Linda:

This email is to inform you that Monitor Well 7MW-32 located at Mine Unit 7 at the Willow Creek ISR facility operated by Uranium One has been placed on Excursion status. This mine unit is operating in uranium recovery mode. A routine biweekly sample of this well exceeded the three Upper Control Limits on January 3, 2012. A second confirmation sample was taken on January 4, 2012. This sample exceeded two upper control limits, which confirmed the excursion status. The results for uranium concentration on this sample was <0.4ppm.

Corrective Actions to address this concern have been initiated. A detailed written report will be submitted within 30 days.

Please contact me if you need any more details.

Regards,

Tim McCullough
