Senior Health Physicist  
Commercial and R & D Branch  
Division Of Nuclear Materials Safety  
Nuclear Regulatory Commission

Re: 52-31352-02

Dear Mrs. Ullrich:

I would like to inform you that International Cyclotrons, Inc was recently down for nearly two months, not measured in consecutive days and for distinct several reasons. Much effort has been dedicated to finally bring up to par the supply of FDG and services rendered to the local Nuclear Medicine community. We are now confident we will be able to again fully comply with expectations.

We recently hired two additional Chemists to assist with production and quality assurance.

We have also obtained insurance coverage in case of decommissioning of the cyclotron. The insurance company will send you proof of insurance on separate mail.

I am also including a personal check for \$7,000.00. I believe this may also serve as further proof of our commitment and determination to comply with all requirements as established by the NRC.

With kindest regards and wishing you very happy holidays,

Frank Kolodziej, MD  
President  
International Cyclotrons, Inc

/c  
Mr. David Rhoe
