**Subject:** License Renewal Application Reference Mail Control Number 576017

Mr. Struckmeyer,

We received your letter dated 12/23/2011 during our Holiday shutdown.

Our intention was and is to use option 2 to renew our license. The current license accurately reflects our radiation safety program and there have been no significant changes to the products we build and distribute or to the materials and procedures we use to build our products.

The September 15, 2011 package contains updates to the licensed users, current training records for 49CFR, and current training records for radiation safety. There are no other changes required at this time.

The following documents are included in the package submitted in September:

Current training record for Brian Kohr documenting his training on 49CFR parts 172 to 180  
Resume of Mr. Anthony Andreucci to do document his experience using isotopic materials in our applications  
Training records and Resumes for Vincent Marini and Mike Grabko documenting current Radiation Safety Training

Mr. Ernest Colella is deleted from the license due to retirement.

My cover letter from September did not clearly list these documents or indicate they were enclosed in the package. I can send you separate copies of these if that is helpful.

Please call me at 978-922-6000 ext 282 if you need additional information,

Sincerely,

Mike Grabko, RSO  
Communications and Power Industries  
Beverly Microwave Division
