Subject: Virgil C. Summer Nuclear Station (VCSNS) Units 2 and 3 Combined
License Application (COLA) - Docket Numbers 52-027 and 52-028
SCE&G Review of Final AP1000 Design Certification Amendment.

The purpose of this letter is to identify the results of a South Carolina Electric & Gas Company (SCE&G) review of the final language of the published AP1000 design certification amendment. This review has confirmed that the SCE&G combined license application for VCSNS Units 2 and 3 appropriately reflects the final language and the associated AP1000 Design Control Document Revision 19. Thus, there are no further submittals known to SCE&G as necessary for completion of the review of the application and subsequent issuance of the requested license under the Part 52 processes.

Should you have any questions, please contact Mr. Alfred M. Paglia by telephone at (803) 941-9876, or by email at apaglia@scana.com.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on this 10th day of January, 2012.

Sincerely,

Ronald B. Clary
Vice President
New Nuclear Deployment
