Subject: Proprietary Slides

Chet,

Per our telephone discussion earlier, we identified the following slides for the upcoming meeting on 1/31/12-2/1/12 contained non-proprietary information inadvertently marked as proprietary.

Balance Of Plant Systems Overview Slides

On Slide 39, we are unsure as to why this bullet was marked as proprietary. It is a common attribute for the main condenser to provide a heat sink for turbine bypass and is described as such in Section 10.4.1 of the SRP. The slides note that there are no exceptions to that section of the SRP.

Electrical Systems Overview Slides

Slides 22 and Slide 26 have questions that were marked as proprietary but were already released publicly via transmittance in ML11361A0881.

Thanks and please let me know if you have any questions.

Ross
