SUBJECT: ABB INC., REQUEST FOR ADDITIONAL INFORMATION CONCERNING
REQUEST TO TERMINATE LICENSE SNM-1067, CONTROL NO. 576602

Dear Mr. Conant:

This is in reference to your letter dated December 21, 2011, requesting to terminate Nuclear Regulatory Commission License No. SNM-1067. In order to continue our review, we need the following additional information:

There appears to be an inconsistency in your December 21, 2011, correspondence requesting license termination of your SNM-1067 license for your site in Windsor, Connecticut. In your cover letter you state that no licensed material possessed under this license is on site. However, on the NRC Form 314 accompanying your letter, you checked the box that all radioactive material possessed under your SNM license has been transferred to your NRC broad scope license 06-00217-06. This license is also for your site in Windsor, Connecticut. Based on completed inspections at the Windsor, Connecticut site in 2011, we also understand that you have disposed of waste generated during site decommissioning at a licensed radioactive waste disposal site. Please clarify the information provided in the cover letter and the NRC Form 314 so that the information is consistent between the two documents and also reflects our understanding of the previous disposal of radioactive waste from the ABB Inc. Windsor, Connecticut site.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 576602. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5236.

J. Conant
