Subject: Stop fermi 3

I went to the last meeting at MCCC and left so frustrated! NRC people don't listen. If they did the fermi 3 plan would be stopped. I listened as many people who have nothing to gain (monetarily) talked about the problems caused by nuclear power and how it's not needed. These were intelligent people who I trust because I know money is not their driving force. Come on, think outside the box! Be creative! Leave this earth a better place not a place with nuclear waste still radiating it's poison !

Seems like this would be a great opportunity for Detroit Edison and the NRC to be the bigger person... It's not fair that we have to be subjected to the dangers and negative effects of nuke plants! Why can't we vote on whether we want a nuke plant in our back yard? We have no say, it's all about profits!!!! The guy who yelled at the beginning of the meeting was right "we are the 99%" and you and your rich corporation heads force this mess down our throats . Frustrated and scared in Monroe,
Marcee Meyers
