Subject: Notifiication to Petitioner of Decision on Immediate Action Regarding 2.206 Petition filed October 20, 2011

Mr. Gunter,

This email is to inform you that the Petition Review Board (PRB) recently discussed your petition with respect to immediate action only. The PRB denied the request for immediate action because there was no immediate safety concern to the plant, or to the health and safety of the public. In addition, the requirement to demonstrate that no functional damage has occurred to those features necessary for continued operation of the reactors without undue risk to the health and safety exists in 10 CFR 100, Appendix A. With respect to the Independent Spent Fuel Storage Installation at the North Anna Power Station, interactions between the licensee and the NRC staff have not indicated any safety concerns.

The review of your petition by the PRB continues and we are preparing for the December 8, 2011, meeting in which you have the opportunity to address the PRB regarding your petition. If you have any questions feel free to respond to this email or call me at 301-415-1119.

Jon Thompson
