Thanks Briana -

I will speak to my supervisor about a site visit. Our travel budget is incredibly tight - at the very least it would be great to set up a conference call to discuss the comments and any concerns. I will work on reading through the NRC and PSEG comments early next week and be in touch then with some dates to talk and any feedback I can get on my ability to travel!

Thanks,

Julie

Julie,

I have attached PSEG's comments on the draft Salem biological opinion, which I received yesterday, to this email. PSEG has suggested that NMFS, NRC, and PSEG meet in person and possibly participate in a short site tour so that the conditions in the final biological opinion can better capture the intake system at Salem. NRC is able to support this request. Please let me know if your office would be able to support you traveling to the Salem site for this purpose, and we can figure out details from there. Thanks,

Briana

Briana: As discussed, attached are the PSEG comments on the draft NMFS BO / ITS. Most are editorial in nature. Also, I recommend that we meet to discuss the comments and potentially to tour / review the intake as a means to provide a better context for finalizing the NMFS document and conditions. We believe many of the physical conditions that existed in the 1980s and 1990s when the prior ITS was developed have been addressed through plant modifications and operational changes. A tour / discussion should provide a clear picture of what is necessary to assure the protection of the resources in the river. Please call with any questions. Thanks.....Jeff

Subject: Draft Biological Opinion for Salem/Hope Creek

Good Afternoon Jeff,

Attached is the draft biological opinion for Salem and Hope Creek for PSEG to review. As I mentioned on your voicemail, Briana Balsam from the Environmental Review Branch will be the NRC point of contact for the ongoing consultation with NMFS. Please review the draft BO and provide comments to Briana before or by December 22nd. If PSEG cannot provide comments by December 22nd please contact Briana to discuss a different due date.

You can contact Briana at [301-415-1042](tel:301-415-1042) or at the email address above.

Thanks,

Leslie Perkins
