Mr. Sattar Lodhi, Ph.D
 Materials Security and industrial Branch
 Division of Nuclear Materials Safety
 US Nuclear Regulatory Commission, Region 1
 475 Allendale Road
 King of Prussia, PA 19406-1415

Q-2

12 January 2012

Dear Mr. Lodhi:

03021063

This letter is to request an amendment to license number 28-07946-06, Amendment No. 08. All but 1 of the items listed on the current amendment have been disposed of. Records of disposal of these materials are maintained and will be available during any future NRC inspection.

Only one Model 3440 Troxler Gauge remains. It has an Americium 241 source and a Cesium 137 source. In the future we may wish to order 2 more Troxler 3440 Gauges. In order to reflect the current inventory and to accommodate the contingency, I request the following changes:

1. Delete all information in columns 6,7,8 and replace it with the following:

Column 6	Column 7	Column 8
A. Americium 241	Sealed Source	132 mc
B. Cesium 137	Sealed Source	44 mc

2. Delete all the information in Section 9 and replace it with the following:

A and B-Troxler Electronic Laboratories Model 3400 Series

All other conditions of the license will remain the same.

Thank you

Clifford M. Pollard
 Safety Officer
 Cold Regions Research and Engineering Laboratory
 U.S. Army Corps of Engineers
