Subject: Request For Assessment and Site Visit

Jennifer,

NFS submitted a license application dated August 5, 2011, to amend materials license SNM-124 to comply with confirmatory Order, Section V, Paragraph 6 (EA-1 0-076). The Order required NFS to complete an assessment of its current CAP against the requirements of NQA-1-2008, Part III, Subpart 3.1, "Non-Mandatory Appendix 16A-1."

To complete our technical review, the NRC staff requests NFS to formally submit the assessment to the NRC. The assessment will be placed on the NFS docket. This will provide us with a basis for finding that you performed an assessment (as required by the Order), and provide part of the basis needed to find that your "enhanced" program has been incorporated into your license (as required by the Order).

The NRC staff intends to discuss the assessment at the NFS site on January 31 and February 1, 2012. The purpose of the site visit is to allow NFS to explain what enhancements were made as a result of the assessment, and where key elements of your "enhanced" program are addressed in commitments in the license

Chris Ryder
