The changes need to be made to Jennifer's version (using Charlie's version for page number reference only). I didn't have a copy of Jennifer's either to refer to, so I had to use Charlie's.

Jennifer will be in later, so we'll have to get them from her then.

Hi Kathy,

If I have understood correctly that the changes in the e-mail below should be made to Charlie's version (vs. Jennifer's modification of Charlie's version) then the attached file reflects the newest changes.

If however I should be making these changes to Jennifer's modification of Charlie's version (where in I reference Charlie's slides solely to locate where to make the changes) then the attached is not correct. To make these changes to that set of slides I will need the electronic copy from Jennifer. I have only a hardcopy of that version (i.e., the 16 page reduced version we last spoke about together in your office).

Please advise. ☺
Scott

Hi, Scott.

Jennifer and I agonized over SOARCA some more and this is the outcome:

Information in this record was deleted
in accordance with the Freedom of Information
Act, exemptions 6
FOIA- 2011-0083

X
S

For the slides, please change the second bullet on page 7 and first bullet on page 14 (pages referenced to Charlie's version) to:
"Effective implementation of mitigation measures will avert core damage or a significant release. Effective implementation of mitigation measures was judged to be likely based on the table top exercises." We think 2 sentences are needed to be clear about the points on mitigation. This will have to be incorporated into the NUREG where appropriate.

Also, please move the 2 pages (15 & 16 in Charlie's version) of offsite consequences tables to backup slides and add back in the two pages (8&9) of graphs for Cs and I releases compared to Sandia Siting Study.

Thanks for your patience and please let me know if you have questions,
Kathy
