

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, DC 20555 - 0001

February 21, 2012

Sharp Electronics Corporation
ATTN: Alexander Pellerito, Jr.
Associate General Counsel – Trade Relations
1 Sharp Plaza
Mahwah, NJ 07495

Dear Mr. Pellerito:

As requested in application dated November 22, 2011, enclosed please find Amendment 01 to NRC License No. 29-24002-01E identifying your California distribution location.

Please review the enclosed documents carefully and be sure that you understand all the conditions. If there are any errors or questions, please contact us so that appropriate corrections and answers can be provided.

While NRC does not intend to take any enforcement action, NRC has concern that Sharp, as indicated in its letters, continued importing and distributing lamps containing krypton-85 after obtaining information regarding licensing requirements and the need to obtain licenses to possess and distribute, continued these activities while pursuing licensing, and only discontinued after speaking with NRC staff. This is a concern because concern NRC's regulatory programs rely upon the integrity of entities, applicants, and licensees to comply with NRC requirements. We want to emphasize that Sharp is only authorized to distribute the product(s) as described in its application and supporting documents. If Sharp wishes to distribute a new product, or if there are any changes to the product, its description, or commitments made regarding the product, the license must be amended prior to instituting such changes.

Please be advised that you must conduct your program involving radioactive materials in accordance with the conditions specified in your NRC license, representations made in your license application, and other rules, regulations, and orders of the U.S. Nuclear Regulatory Commission, now or hereafter in effect, to include the following:

1. Comply with applicable NRC regulations in 10 CFR Part 30, "Rules of General Applicability to Domestic Licensing of Byproduct Material"; 10 CFR Part 32, "Specific Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material"; and other applicable regulations.

NOTE: Licensees authorized to distribute or initially transfer products containing byproduct material must also possess a valid possession license issued either by NRC or an Agreement State(s) which authorizes possession and use of byproduct material

2. Distribute only those products containing radioactive material which are specifically authorized in your license.

3. Notify NRC in writing within 30 days of any change in mailing address.
4. Request and obtain appropriate amendments if you plan to change control or ownership of your organization, change locations of distribution of products containing radioactive material, or make any other changes in your program which are contrary to the license conditions or representations made in your license application and any supplemental correspondence with NRC.
5. Submit a complete renewal application or termination request at least 30 days before the expiration date on your license. You should receive a reminder notice approximately 90 days before the expiration date. Continued distribution of products containing radioactive material after your license expires is a violation of NRC regulations.
6. In accordance with 10 CFR 30.36, request termination of your license if you plan to permanently discontinue activities involving distribution of products containing radioactive material.

You will be periodically inspected by NRC. Failure to conduct your program in compliance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action(s) against you. This could include issuance of a notice of violation; proposed imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in NRC's Enforcement Policy (<http://www.nrc.gov/about-nrc/regulatory/enforcement/enforce-pol.html>).

In accordance with 10 CFR 2.390 of NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in NRC's Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you have any questions concerning the license, you may contact me at (301) 415-7826.

Sincerely,
/RA/
J. Bruce Carrico
