Re: Materials License Amendment

Dear Frank:

Gerdau Monroe Mill has recently started a capital project to build a new steel casting machine that will utilize 6 sources of CO 60 material to measure the level of steel in the molds. Our current License (#21-18673-01) allows for 5 sources of CO 60 material. We would like to amend our current license to allow us to have 11 sources of CO 60 material so we can run our current caster and the new caster. Once the new caster is operational and approved, we will be sending the original 5 sources back to the original manufacturer (Berthold).

If you have any questions regarding this submittal, please contact me at 734-384-6544.

Sincerely,

A handwritten signature in black ink, appearing to read 'Craig Metzger'.

Comments:

Hi Frank,

Thank you for contacting me so quickly on our license amendment. As we discussed on the phone, attached is our letter documenting our request for an amendment to our current license. Please let me know if you have any further questions. Thanks.
