FEB 09 2012

Larry Lockwald
Radiation Safety Officer
Testing Service Corporation
360 S. Main Place
Carol Stream, IL 60188

Dear Mr. Lockwald:

Enclosed is Amendment No. 02 renewing your NRC Material License No. 12-17951-02 in accordance with your request.

Item 3 of your application listed six locations of use. However, all of these locations are located in Illinois, an Agreement State. Therefore, we could only authorize you to use your licensed materials at your temporary job sites in the United States where the NRC maintains jurisdiction.

Please note, as we discussed by phone on February 8, 2012 we have only authorized Items 5, 6, 7 and commitment for routine maintenance of gauges in application dated August 9, 2011. Also as we discussed, we have added Condition 11 regarding training for authorized users, Condition 20 regarding occupational dosimetry and Condition 21 regarding operating and emergency procedures.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate answers and corrections.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the
