Dear Sirs

I am writing you to register  
my feelings regarding the proposed  
building of William States Lee III Nuclear  
stations - Unit 1 & 2. I AM OPPOSED!!!

It is a BAD IDEA.

The existing nuclear facilities in the  
USA are all in need of serious  
maintenance work or should be shut  
down. We cannot SAFELY HANDLE  
EXISTING Nuclear WASTE let alone  
produce more. →

~~John A. Frank, Co-Founder (World Council for Reconciliation)~~  
~~P.O. Box 2145, Berkeley, CA 94701-0145~~

① Nuclear power is dangerous + toxic.

② Broad River + the Carolina Fantail darter fish would be threatened

③ LOCAL Agriculture would suffer

④ Populations of GAFFNEY, Charlotte & nearby Asheville, NC would be endangered.

⑤ Tourism would suffer

⑥ \$ Extreme COST - Extreme Risk

⑦ Uranium mining - endangering lives of all miners & workers in/around the plant.

⑧ Contaminated SOIL out of 10<sup>4</sup> US Reactor sites - at least 100 have already poisoned the SOIL which in turn is poisoning our WATER.

⑨ AP 1000 Westinghouse design is FLAWED and UNSAFE.

⑩ There are safe, renewable, clean energy sources / technologies AVAILABLE. \$ should be spent to CLEAN UP / MAINTAIN & SHUT DOWN AGING PLANTS & SHUT PREVENT MORE FROM DAMAGE. MORE FROM RADIOACTIVE WASTE
