Subject: Nuclear Waste Initiative

Dear NRC:

No more nuclear plants should be licensed or built. It is time to start phasing them out and replacing them with a decentralized smart grid of solar, wind, tidal, small scale hydroelectric, conservation, biomass conversion, hydrogen, geothermal, and co-generation power plants. There is no solution to the nuclear waste problem. It is too dangerous because of the threat of terrorism and sabotage. It is too expensive to build and operate securely and safely. And it is totally unnecessary for our energy needs. Please read the Nov. 2009 Scientific American article by Jacobson and DeLucchi on converting to a renewable energy economy by 2030. Nuclear power is too dangerous, too expensive and unnecessary for our energy needs.

Sincerely,

Mr. Paul Roden
Yardley, PA
