Subject: Nuclear waste

I wish to make a few comments on nuclear waste storage. The 120 year or even the overly optimistic 200-300 year expected safe on site storage of the waste gives me no satisfaction at all. The danger will continue long after this as we all know. It appears that HOSS storage would be better. It is also vital that the costs of storage be factored into the cost of the electricity so that the future public isn't cheated.

I could say more but this may be enough for now.

Sincerely yours,

Theodore Wilcox, Ph.D.
