**Subject:** Pre-Application Meeting  
**Date:** Tuesday, February 28, 2012 6:52:56 AM

---

Mr. Ryder,

Westinghouse hereby requests a pre-application meeting, the purpose of which is to discuss a pending SNM-1107 license amendment. The topic of this amendment is the disposition path Westinghouse has determined to be appropriate to safely and efficiently address the Uranium Hexafluoride (UF6) Cylinders which have been the subject of recently filed Event Reports for Docket 71-9196, pursuant to 10 CFR 71.95 (Westinghouse letters LTR-LCPT-11-17 and 27). This discussion and associated presentation slides will include commercial contract information and is therefore Proprietary in nature. Westinghouse intends to address the alternatives evaluated, the reasoning behind the disposition path chosen, and the proposed license application submittal along with associated schedule. Westinghouse wishes to engage the NRC early in this process to gain any additional insights the staff may have as to the proposed safety case and license approach. Westinghouse requests the pre-application meeting be held in mid April if possible. Please provide accommodations for the appropriate Region II staff to participate .

Best Regards,

Gerard Couture
