**Subject:** Hardened On-Site Storage

As a grandmother of a 2 year old I urge you to propose hardened on-site storage for nuclear waste. I feel that nuclear power should be eliminated because of the dangers it poses to the children of our world; however, if it cannot be eliminated then the waste should be stored in the best way possible. The pools on top of nuclear power plants are leaking nuclear waste into waterways and drinking water. In addition, they are a fire danger which can produce thousands of cases of latent cancers. We must take a lesson from Fukushima and reduce nuclear dangers to our children.

Doris Fulton  
retired teacher  
mother  
grandmother
