Subject: On-site Storage of high-level radioactive waste

The NRC's current "Nuclear Waste Confidence Decision" is absurd. On-site storage of high-level radioactive waste in indoor pools and outdoor dry casks is NOT safe for 120 to 300 years. Fukushima proved that conclusively, and there is a great deal of other evidence regarding leaks. You must require Hardened On-Site Storage (HOSS). And let's face it, nuclear power needs to be phased out to stop the generation of high-level radioactive waste in the first place. But I don't really expect you to do this, because you are a bunch of industry sellouts, and you believe your own lies. So I expect you to continue to pander to the profit statements of your client corporations. That's the shameful reality of the NRC. Profits over people. Sad.
