Subject: Nuclear energy plants

U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Sirs;

Please stop permitting the construction of new nuclear energy plants. There is no way to store nuclear waste safely during the time this waste emits dangerous levels of radiation, and the risk of accidental release of radiation or even explosion of an energy plant is too high. There are alternative sources of energy that just need implementation money to provide all the energy America needs from sustainable sources. We do need the seed money to increase the efficiency and storage of this new wind, solar and geothermal technologies. Repeating failed attempts at developing nuclear energy has just delayed private investment in these alternative energy sources.
