Subject: Storage of nuclear waste

I am concerned that storage of nuclear material onsite at nuclear power plants is being ignored and is not part of the approval process. We have no method to eliminate nuclear waste material except to store it underwater on the power plant site. This policy is insane and must be stopped. There is no storage area and therefore no safe way to build more power plants. We must stop or current support of nuclear power plants until there is a new safe technology that eliminates waste storage.
