**SUBJECT: REQUALIFICATION PROGRAM INSPECTION – NINE MILE POINT STATION,  
UNITS 1 AND 2**

Dear Mr. Langdon:

In a telephone conversation on September 13, 2012, Mr. Peter Presby, Senior Operations Engineer, and Mr. Phillip Amway, General Supervisor Operations Training, made arrangements for the U.S. Nuclear Regulatory Commission (NRC) to inspect the licensed operator requalification program at the Nine Mile Point Unit 1 and 2 facilities. The inspection is planned for the week of November 11, 2012, which coincides with your regularly scheduled requalification examination cycle. The inspection will involve observation of examination administration at Unit 1, with administrative review of Unit 2. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with 10 CFR 55.59(c), the NRC may request facility licensees to submit their biennial comprehensive requalification written examinations or annual operating tests as necessary to support the NRC's inspection program needs. In order for the NRC to adequately prepare for this inspection, please furnish: 1) an index or summary of condition reports written in the past two years in which licensed operator errors were determined to be the root or contributing cause; 2) an index or summary of condition reports written in the past two years on simulator performance problems; 3) an index or summary of simulator performance test results in the past two years; and 4) the examination schedule, sample plan, and operating tests scheduled for the week of the inspection to the NRC by October 29, 2012. Mr. Amway has been advised of this request and provided with the name and address of the NRC lead inspector assigned to this inspection.
