Additional Sealed Source Model Numbers

(NOTE: This will be used as the
Documents Title in ADAMS)

9/11/2012 (14:30) Mr. Rehnquist provided additional information regarding sealed sources distributed to NASA by QSA Global. AMRB14878 = VZ-3516; PPRB15379 = VZ-497; SIRB11588 = VZ-1370; and AMRB11586 = VZ-1370, It was determined that the model number 2u391 was actually a serial number rather than a catalog number. It was recommended that I contact QSA Global and determine whether they could supply a model number for the sealed source. (15:00) I spoke to a representative of QSA Global in the Regulatory Department who referred me to Mr. Fuller as the individual who would have the information about the sealed source. Mr. Fuller was not in his office and I left a voice-mail message for him to get back in touch with me. 9/12/2012 (08:15) Mr. Fuller was not in his office and I left a message for him to call me. (11:00) I spoke with Mr. Fuller about my request for a model number for a sealed source possessed by NASA. He asked me for the serial number, the isotope and the name of the manufacturer. He stated that he would get back to me later in the day and be able to either provide the model number or that no record exists regarding the serial number provided.
