Subject: Indian Point relicensing

I would like to go on record as saying I feel Indian Point should not be relicensed. It is too close to too many people in terms of risk, both with the possibility of internal failures and external terrorist threats. I also do not feel the claims of rolling blackouts if IP is decommissioned are valid. We have a 6.3 kilowatt solar system on our roof and pay 0% of electricity charges. It is totally feasible to find other solutions. Please consider the feasibility of living without a nuclear power plant in Westchester.
