**Subject:** SHPO Comments and Related Commitments

Haimanot,

This email follows up on our teleconference of 7/31 regarding the ALAC responses to comments from the SD SHPO. The conclusion of the teleconference was that Powertech would commit to certain actions in response to a written request from NRC staff. While we have not received the email yet, we wish to maintain the momentum of the Section 106 process and pursuant to our 7/31 discussion, hereby commit to the following :

- To install protective fencing around the unevaluated EuroAmerican burial site identified on Site 39FA1902 before undertaking surface disturbing activities in the area.
- To evaluate the sites identified as 39FA778 (located beneath a planned treatment pond), and the cabin structure in Area 8 of Site 30FA96 that contains the barbed wire.

Please let me know if you need any additional information at this time.

Richard Blubaugh
